

I have been listening to XM radio for 4 months now and love it. It is nice to thinly have stations that I feel okay to listen to with my 5-year-old son. I cannot imagine why anyone would want to stifle the growth of such a great service. I appreciate having such a wide variety of channel choices and like to be able to listen to weather and traffic on my commute. To try to stop such a great service is in mind is unfair and unconstitutional.
